

Landscaping update

TELUS will continue to restore property and landscaping disturbances that have occurred while placing fibre to build the new network. However, due to severe winter weather conditions, the reparations will resume in spring once ground thaws.

To answer any immediate questions or concerns about property restoration, please email our dedicated fibre team at: TMVBescalationsAB@telus.com 

- ✓ This will include repairing any disruptions on your property, lawn or surrounding property including when necessary filling in potholes and placing sod or seeding.
- ✓ TELUS will assess each property individually to determine the scope of reparations required to restore property back to the original state.
