FireSmart Work

Edson, Alberta, December 14th, 2017 – FireSmart resumes this week in Edson.

Residents may notice small controlled burns and light equipment in the area north of the soccer pitches and Parkland School starting as early as today.

The FireSmart program is designed to help thin and clear deadfall from wooded areas around the community, better protecting it in the event of a wildfire.

Please stay clear of the area while work is underway.
