Multi-Use Facility Steering Committee Considers Options

(Edson, AB / January 15, 2020) The Yellowhead County and Town of Edson Multi-Use Recreation Facility Joint Steering Committee met on January 15, 2020 to evaluate the geotechnical results for the Griffiths Park location and set the next steps for the project.

After reviewing the latest geotechnical results, the steering committee committed to further exploration of other sites, including reconsidering the current Repsol site to ensure best value for tax payer investment.

The representatives of the steering committee, on behalf of their respective councils, reaffirmed commitment to both the project scope and \$70 million cost as previously agreed to by both partners. The next steering committee is scheduled for late February.
